

INDUSTRY LEADING SCHOLARSHIP DATABASE

Unigo helps students and parents get the best Return-on-Education with personalized tools that match students to the right schools and scholarships based on their unique needs.

- Nearly **800,000 users** per month
- Over **1.6 million** registered users
- **650,000** reviews across 7,000 colleges
- **3.6 million** scholarships worth over \$14 billion

UNIGO SCHOLARSHIP API

Two Options

Leverage the power of Unigo's scholarship database on your site:

SCHOLARSHIP DIRECTORY API

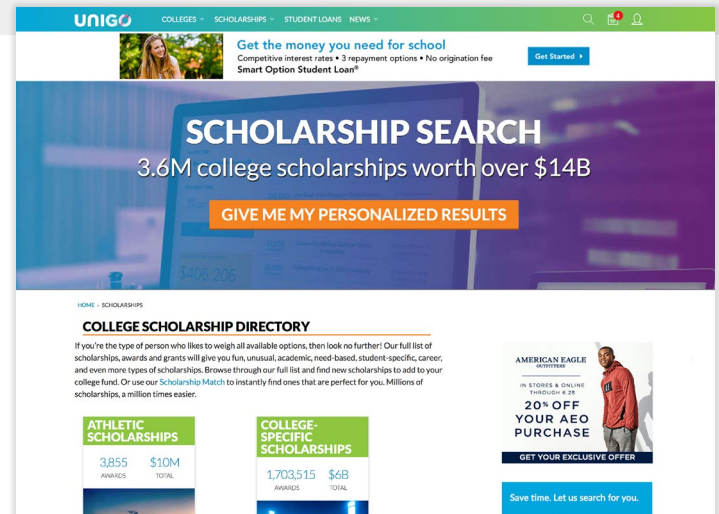

API provides listings and categories for all Unigo's scholarships.

- Integrate directory and listings as content on your site to drive traffic and engagement
- Snippets are provided for all listings, which link back to Unigo for full details and a link to the scholarship

FULL SCHOLARSHIP MATCHING SYSTEM API

Leverage Unigo's Proprietary Scholarship Matching technology on your site in a white label solution.

- 47-question student questionnaire
- User-specific results
- Scholarship details and links to application submission site
- Data capturing: keep all student data submitted during the matching process

Unigo's Scholarship Directory

Our directory is curated by humans to ensure accuracy of scholarship information and to eliminate broken links. The directory is structured by type to allow for easy searching.

Custom Matching

Through a 47-question survey, students are **matched to specific scholarships** for which they qualify. And with our **reverse funnel filtering**, the more info we have about a student, the more accurately we can match them to potential scholarship opportunities.

Bringing the Unigo Scholarship API to your audience is simple and implementation can be completed in as little as a week, depending on integration.
